

2023-10-05 Start: 15:30 UTC **End:** 16:30 UTC

Participants: Leo, Grizz, Steve, Yan, Pete

Apologies: Martin, Arnold

Main agenda

- Input from AC: request for a regular priority list on what to do and why. In some cases, we might need to change policy or redesign a feature and knowing that will help us develop integrated solutions that meet everyone’s needs. (See discussion in #admincomm channel in Slack about response times)
 - Most tickets are now being automated, which is a good thing
 - Leo to send a note to AC requesting input on priorities
- WebUX update: starting with campus, parallel testing and feedback on specific design questions, incremental changes
- Search v2 - rollout status, remaining blockers

| Number | Title | Summary | Consent Finalized? |
|-----------------------|--|---|---|
| #1437 | Investigate performance tuning opportunities | Analysis of opportunities to lower computational overhead. Goal is to identify performance and cost improvement opportunities. | YES |
| #1020 | Add API calls for commonly run queries | This is the general case of #1435 discussed last month: <ul style="list-style-type: none"> ● What few queries should we add support for? | Investigate if we can do this with Elastic search |
| #1408 | Public Logging of Object Request Rejections | A technical evaluation of this would be at least a Major work item. What are the specific requirements we want? <ul style="list-style-type: none"> ● What data should be gathered, stored, published? ● Where should we publish? ● How automated do we want that process to be? ● Is structured data enough or do we need room for narrative? | Defer to next month |

Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

| Number | Title | Summary | Consent Finalized? |
|-----------------------|--|---|--------------------|
| #1438 | API list net documentation says "org" is a string, but it actually contains a dictionary | As title | YES |
| #1048 | TOTP devices sort is by id. However, only username is shown | As title | YES |
| #1446 | v2 Search - extra facility results are returned with exact match search | As title | YES |
| #1447 | v2 search - support for ISO 3166 alpha-2 country codes | Searches that use ISO 3166 alpha-2 country codes give different results than searches that use the short English name | YES |
| #1451 | Cosmetic issue with affiliation emails and double-slash in URL | As title | YES |
| | | | |

Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.

| Number | Title | Summary |

AOB

Inconsistencies in city names e.g. Milan versus Milano. v2 search resolves this and there is consistency between the API and the UI. Nonetheless, we still need to normalize the names in

the database. We could keep the user entered data as well as enabling search through a normalized name. Leo to draft and issue and share it on the list.
