**Participants:** Paul Hoogsteder, Leo, Grizz, Jack, Pete, Martin, Steve, Jeff

**Apologies:** Arnold, Yolandi, Yan

### Main agenda

- Introduce potential new member
- Followup in [#1408](#) (Public Logging of Object Request Rejections): Peter Helmenstine [has investigated and found](#) few formal rejections. Most cases are a lack of response after a request for additional information.
  - Agreement that we should work towards more transparency
  - Suggestion to look at using pdb-stats (see: [#1500](#)) to see the scale of what is happening
  - Hard to get good stats out of DeskPro but that's no reason not to take small steps towards improvement. Discuss more at NANOG 90?
  - Marty to make a proposal
- Calculating the cost of exporting individual queries in different export formats (.CSV, .JSON, and .KMZ) [grizz@20c.com](mailto:grizz@20c.com)
  - No significant cost difference between export formats
  - Possible easier than trying to guess the specific exports people would like to be pre-generated
- UI/UX Refresh - Update on progress/timing ( Leo Vegoda )
- NANOG 90 - who's going?
  - Pete, Jeff, Marty, Steve (maybe) - possible lightning talk
  - Leo to prepare a draft for review and edits
