

**2024-04-04 Start:** 15:30 UTC **End:** 16:30 UTC

**Participants:** Paul, Grizz, Jack, Jeff, Leo, Martin, Yan

**Apologies:** Arnold, Steve

### Main agenda

- Review [Active Beta Process](#). Decide on changes or agree.
  - Just put notifications and discussion on the mailing list and not Slack to avoid duplication and miscommunication.
- 20C feedback: [API Cache Performance Fixes](#): either “Proposal A: Limit depth requests to a low number (10)” or “Proposal B: Fix performance issues based on rendering of depth 0 data.”
  - PM to schedule work
- Note: new site design with better mobile support being developed for testing on [preview.peeringdb.com](#)
  - Consider severely cutting back what is offered on mobile phone browsers as most people might only want to search for an ASN etc... Find out exactly what mobile users want and need. Also consider doing an app - though submitting that to an app store can be lots of work
- Consider closing issues in “Decide” status that have not been commented on for 12 months
  - Proposal: A rolling process where the 12 oldest issues with no comments for 6 months or more are closed off. Update the issue noting that if it’s not commented on within a month it will be closed.
    - OK
- Discuss expanding the software development budget
  - Marty suggested spending more money on software development to advance the product more quickly.
  - ACTION to develop a one pager on this and discuss with board or at the Strategic Planning meeting in June
- Dedicate resources to addressing several [peeringdb-py issues](#). We want people to use a local cache when they can, so ensuring that peeringdb-py works well is important.
  - Propose scheduling 4 issues, estimated at \$1k to \$1.5k

Number	Title	Summary	Consent Finalized?
<a href="#">#1477</a>	MMR Object	As title	Review PDB schema at a later date
<a href="#">#1557</a>	Add a Virtual IX Flag field to	Is the IX based on a switch fabric or not?	YES as an

Number	Title	Summary	Consent Finalized?
	IX Object		autogenerated "has not fac" list that users can query  See link to related and interesting <a href="#">#607</a>
<a href="#">#1560</a>	Add trust flag to accounts in PDB Deskpro tool to improve automation	Build a reputation for users that have demonstrated their trustworthiness in previous transactions, allowing faster processing for new transactions	CLOSED
<a href="#">#1578</a>	BFD Column on ASN's IXP List looks bad on mobile sized screens	We've been adding data like BFD and small screens don't always display things properly. Sometimes, we drop the more important data in favor of less important data.	Check when new webUX is in preview
<a href="#">#1579</a>	Refine Mobile Presentation of PeeringDB	What should we show on mobile? Should we develop a PeeringDB app?	As above
<a href="#">#98</a> (django)	ORM configuration Options is missing (postgreSQL)	Want a peeringdb schema	OK
<a href="#">#1584</a>	Passkey support for login	Add and extra MFA option	OK
<a href="#">#1585</a>	Publish OAuth authorization server metadata endpoint	Publish a /.well-known/oauth-authorization-server file	OK

### Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

Number	Title	Summary	Consent Finalized?
<a href="#">#88</a> (py)	docs need updating to reflect some api changes to the	Update peeringdb-py docs	OK

	Client.update_all() call		
<a href="#">#86</a> (py)	DB sync fails due to validation error	Support for campus objects?	OK

**Informational**

No action required. Members should be aware that these new issues have been agreed since the last meeting.

Number	Title	Bug?	Summary
<a href="#">#100</a> (django)	Missing migration for changes on IXLan, Network, NetworkFacility and NetworkIXLan	?	Needs to be investigated
<a href="#">#1583</a>	bfd_support undocumented parameter in API	Yes	Should have been automatically added
<a href="#">#1586</a>	Django admin date selector month "Next" and "Prev" emojis/glyphs are missing/invisible	Yes	UI for admin site

Number	Title	Summary

**AOB**

- Geocode normalization - need an issue and Yan to do this
- City name normalization - need an issue and Yan to do this
- [#1563](#) (CSV and JSON exports truncate at 250 records) - add to next agenda but this is linked closely to the api-cache improvement issue. Consider publishing cached CSV files for use by tools like ARCGIS and also look at making the rate limiting more intelligent, so queries like "give me all facts in the US" can easily be exported
