BACKLOG OVERVIEW
PC members can [click here](#) for the an issue status and planning overview

Bugs	Not Bugs
20%	80%

Percentages might not add up 100% because of rounding

GitHub Milestone Categories	Number	%
Agreed for v3 API	2	2
Yet To Decide / to be decided	46	36
Consensus Reached	0	0
Consensus Finalized	4	3
Needs Implementation Discussion	31	24
Ready for Implementation	26	20
Scheduled	12	9

Note: A group of issues in "Decide" status without discussion for six months or more were closed since the August 2025 meeting.

LAST THREE MONTHS
There is generally one release per month. Urgent bugs can be fixed with an emergency point release. There is no scheduled release during December.

Some operations work is not included in the GitHub issue summary.

Issues Closed	
Major enhancement	1

Other enhancements	12
Bugs	14
Total	27

RELEASE OVERVIEW
Next Release (October, 2.73.0)

#1805	**Major enhancement** SLIs	Deploy SLIs for page load time and other important performance metrics
#1755	**Noteworthy minor enhancement** Oauth for org without a net	PeeringDB orgs without a net, e.g. carriers, will be able to offer login via PeeringDB Oauth
#113	**Noteworthy bug fix** peeringdb-py	peeringdb-py won't start if failed_entries.json is broken

Schedule for major issues

Month, version	Major feature	Narrative
November, 2.74.0	Let users opt in to new web features	The iterate and expand issue has not been approved, so this is a substitute
December	NO RELEASE	
January, 2.75.0	Changes (possibly operational) arising from SLIs.	No issue created yet.
February, 2.76.0		

Main agenda
- Status of transition to containers and overall service availability. grizz@20c.com
    - Recent issues likely down to AI scraping, which takes advantage of the one aspect of service not rate limited. Improvements being deployed should allow horizontal scaling as an interim solution, with #1805 coming to provide more medium term solutions.
- IXPs using IPv6 ULAs, what is the rationale for (not) letting them register their peering LANs in PeeringDB?
    - Current Admin Committee Guidelines for approving IX objects will need to be changed.

- - ○ Leo to draft a one-pager and send the agreed version to the board for a decision
  - Renaming GitHub issues: Livio suggested that the issue name on Release Notes should describe the outcome, even when the decision is for something different. Perhaps we should rename GitHub issues before scheduling if the original name does not match the agreed deliverable. That would mean the GitHub issue and Release Notes match and have a useful summary for users.
    - ○ There is no data loss and users tracking an issue can be notified of activity.
    - ○ Grizz prefers closing the original with a link to a new issue with the summary from the old one, to make it easier to implement.
  - Communications plan: we should have a plan in place to communicate with users on operational issues. A draft plan has been prepared for comment.
  - IXP reseller connections: should we add something to indicate when an IP address is used by a reseller connecting multiple networks? This could help with debugging sudden changes.
    - ○ Positive reception to the concept
    - ○ Would need to be manually set by the IX at the moment
    - ○ Possibly needs a change to the IX-F format

Number	Title	Summary	Consent Finalized?
#1835	Use Cloudflare or any free CDN to improve performance	Recent performance issues	Significant discussion on various approaches to improving performance including read pools, architectural changes, and/or API changes

Consent Agenda
Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

Number	Title	Summary	Consent Finalized?
#1844	Exclude AC members from rate limiting	As title	

Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.

Number	Title	Bug?	Summary
[#1838](#)	Affiliation requires ASN, but text on page suggests it isn't required	Yes	As title
[#1839](#)	API query broken?	Yes	Country search is broken using API
[#1845](#)	Undeleting a network when the parent org is still deleted results in unhelpful 500 error message	Yes	As title
